

5. You should now have four flower shapes forming cone shapes. Using a cocktail stick roll down each petal on each flower away from the centre to create pretty curled petals.
6. Cut the pointed end off the three smallest flowers. (Do not cut the biggest flower as this will form your base).

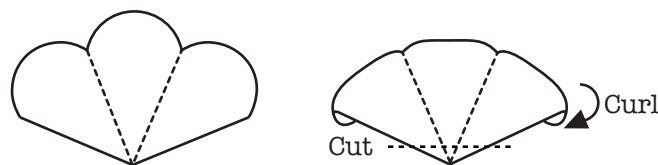

7. Place some glue or a glue dot in the centre of each flower and layer the flower shapes up so that the smallest is at the top of the pile.
8. Take the heart shape petal which was cut from one of the flowers earlier and curl one of the petals leaving the other straight.

9. Bring the shape together to form a funnel and glue together. Again cut off the pointed end.

10. Now take the three sided petal, curl the edges back on themselves towards and cut off the pointed end. Wrap this around the center funnel.

11. Glue in the middle to complete the flower.
